Key Facts About YUI

- **License**: It was released under the permissive BSD License, making it free for both personal and commercial uses.
- **History**: Developed by Yahoo! engineers, it originally launched for public use in February 2006.
- **Current Status**: Yahoo officially stopped active development on YUI in October 2014 with its final version, YUI 3.18.1.
- **Source Code**: You can still find the archived code repositories publicly on the official YUI3 GitHub page.

If you are looking to build a new project, it is highly recommended to use modern, actively maintained frontend libraries or frameworks instead.

If you'd like, I can suggest **modern alternatives** to YUI. Are you looking for a **lightweight utility library** or a **full-scale application framework**?
